CLOUDPILOTS is your partner for Google Workspace and other applications in the cloud. With expertise in the digital transformation of the everyday working environment, our customers enjoy the professional and friendly handling of their challenges in the cloud. Together with our customers we work out the best options to ensure a smooth workplace environment for the end users.

As experts in the field of cloud computing, CLOUDPILOTS has developed different applications and services to create the most pleasant experience for customers of all sizes. The self-service tool Advanced Admin lets administrators handle their daily tasks efficiently, while our managed service AUTOPILOT helps companies to flourish in Google Workspace.

Depending on the challenge set by customers, our experts in their respective fields find fitting solutions that not only save expenses, but also support efficiency and create further opportunities for customers in the cloud.
